

Honeywell Avionics — Spares Supply Chain Report

This internal report summarises recent observations and KPIs for the spares supply chain for the Avionics division. It contains quantitative metrics, operational notes, and a sample parts table to support a Retrieval-Augmented-Generation (RAG) pipeline exercise.

Executive Summary

Over the past quarter, lead times have varied across regions. Root causes include vendor delays and customs clearance. Recommendations include incremental automation for inventory reordering and improved vendor SLAs.

Operational Observations

- Region A experienced a 12% increase in expedited shipments due to stockouts.
- Region B showed a 7-day increase in average lead time during monsoon months.
- Spares accuracy (picks vs orders) remained at 98.2% but returns increased slightly due to labeling errors.

Notes on data sources: Data aggregated from ERP, WMS, and Vendor portals. Timestamp alignment used UTC.

Key Performance Indicators (KPIs) - Q3

Metric	Region A	Region B	Region C
Avg Lead Time (days)	14	21	12
On-time Delivery (%)	93.4	88.1	95.0
Expedited Shipments (%)	6.1	12.5	4.0
Inventory Turns	3.5	2.8	4.1

Sample Parts List

Part ID	Description	Category	Qty On Hand	Lead Time (days)
P-1001	Avionics Control Module	Control	25	30
P-1002	Navigation Sensor	Sensor	10	45
P-1003	Hydraulic Actuator	Actuator	5	60
P-1004	Power Regulator	Power	40	20
P-1005	Comms Antenna	Antenna	18	25

Table notes: Lead time is the supplier-provided estimate; Qty On Hand is snapshot at close of quarter.

Spares Replenishment Process

The replenishment pipeline triggers reorders when forecasted demand exceeds safety stock. Safety stock is computed using historical demand variance and desired service level. Vendor lead times are updated monthly from vendor portals; exception workflows exist for critical parts.

Exception Handling

Critical parts (defined as those with mean time to failure < 1000 hours) follow an expedited PO path with parallel approvals. All exceptions require a documented root cause within 48 hours.

Appendix

Glossary

- ERP: Enterprise Resource Planning system.
- WMS: Warehouse Management System.
- SLA: Service Level Agreement.
- Lead Time: Time between order and receipt.
